

If You Don't Take Time To Be Well – You Will Have To Take Time To Be Sick

New From Celebration Health... First In S.A. To Offer This Service

What's Your Health Status ... *Right Now?*

- **Is Your Digestive System Processing Food Properly?**
- **Is Your Liver Doing Its' Job?**
- **Are Your Kidneys In Optimum Condition?**
- **What Is The Condition Of Your Cardiovascular System?**
- **Are Your Multi-Vitamins Effective And Being Absorbed?**
- **Are Your Vitamin D Levels Normal?**
- **Are You Drinking Enough Water?**
- **Are You Getting Adequate Blood Flow To Your Brain?**

What If...

All of these questions concerning your health... and more could be answered accurately and with the results reviewed and presented to you in a printed report format and you could take all of this information with you? After all, it's your health. Shouldn't you have control over it?

What If...

20 easy-to-understand, reports reflecting various conditions of your body's health systems could be available and the testing was accomplished without any blood being drawn or without submitting your body to any radiation?

What If...

All of this could be accomplished in about a half hour and for a nominal fee? Does this seem like something you would expect to have available in the future?

What if... The Future Was available to you Now?

No More Guesswork...

The Future In Whole Health Analysis Has Arrived

When our health is in poor condition, our body will automatically give out certain alarms, such as fatigue, body aches, headaches, insomnia, lack of appetite, depression, anxiety, stress, fear, bad temper, palpitations, dizziness, inertia, and so on. People who have these symptoms are determined to be in sub-health condition. The World Health Organization estimates that 10% of adults worldwide belong to this group.

Is sub-health detectable? The answer is YES.

No longer will there be a need for ultrasonic, nuclear magnetic resonance or radiography to know your health condition.

Know Your Health Status In Minutes With Our Hi-Tech Diagnostic Analyzer

Introducing the newest high-tech innovation that combines the best of medicine, bio-informatics, electrical engineering and other sciences. Applying quantum medicine as the theoretical basis, this advanced electronic equipment collects the weak magnetic field of human cells for scientific analysis, thereby analyzing and determining a person's health status and main problems and putting forward standard prevention recommendations.

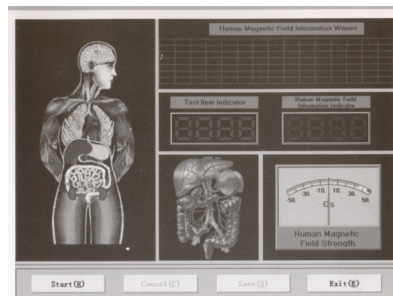

Invented in the East by a team of medical and computer experts, the Magnetic Health Analyzer was developed based on the study of a hundred million clinical cases over a period of many years. The accuracy rate of the analyzer device can reach up to 85%.

By holding the sensor in your palm, hundreds of health data information will be obtained from your body within minutes. This is definitely not out of a science fiction movie; It is the epoch-making high-tech quantum resonant magnetic analyzer.

Non-Invasive And Painless

The analysis will tell you the condition of your health without blood analysis or radiography.

No Radiation - No Blood Drawn... 20 Health Reports Produced In Just 2 Minutes

Plus... Male Sexual Function Analysis

- Basic Physical Quality Analysis
- Blood Sugar Analysis
- Bone Disease Analysis
- Bone Mineral Density Analysis
- Rheumatoid Bone Disease Analysis
- Brain Nerve Analysis
- Human Toxin Analysis
- Pancreatic Function Analysis
- Prostate Analysis
- New** • Skin Health Analysis

- Cardiovascular & Cerebrovascular Analysis
- Gastrointestinal Function Analysis
- Gallbladder Function Analysis
- Kidney Function Analysis
- Lung Function Analysis
- Liver Function Analysis
- Gynecology Analysis
- Trace Elements Analysis
(Ca+, Fe, Se, Pb, Zn, Vitamins, etc.)

No Waiting For Test Results...

Whatever conventional testing method used, blood analysis or radiography, you have been made to wait...one, two, or as long as three weeks to get your results. This can create depression and additional anxiety in anticipating the unknown. The hi-tech Magnetic Health Analyzer scans your body and will produce your health reports in just 2 minutes. All of the reports will be reviewed, compiled and presented to you in a consultation at the time of the testing and you will also receive a composite report.

Your Health - Your Reports...

Conventional Testing Protocol Scenario- You schedule an appointment with your primary care physician. The doctor then prescribes the tests to be performed and where they should be conducted. You have the blood drawn, CT scans or whatever has been prescribed. Your tests are then sent to a lab to be analyzed. Then possibly sent to be reviewed by a technician. After a period of time, via mail or fax, your doctor receives the results. You are contacted to set up another appointment with your doctor to review the results.

Copies of your lab reports are placed in your file in the medical office. *If you ask*, the doctor may, reluctantly, get you copies of your own test reports. It seems everyone wants to take control of YOUR health and YOU get left out. Throughout the following month, you start collecting the bills from just about everyone that handled your test results.

Testing Protocol With Our High-Tech Health Analyzer - You arrive for your Celebration health appointment at our office in Rynfield, Benoni. After completing a simple form, you are seated in a private room. You are asked to hold a testing rod while watching the computer software gather all the data from your body's various health systems. In two minutes your 20 health reports are ready. Each of the 20 categories are reviewed with you as they are printed. Your Whole Health Diagnostic Report is compiled and presented to you. You pay the low fee and take your results with you. No bills in the mail from us. You can do whatever you choose with the findings to help put your health back on track.

It's Your Health.. Finally You Are In Control.

The Science Behind The Analyzer

The human body is an aggregate of numerous cells, which continuously grow develop, split, regenerate and die. By splitting up, cells renew themselves. For adults, about 25 million cells are splitting up every second and blood cells are constantly renewing at a rate of about 100 million per minute. In the process of cellular split-up and renewal, the charged bodies of nucleus and extra-nuclear electrons as the basis unit of a cell, are moving and changing ceaselessly at a high speed as well, emitting electromagnetic waves without interruption. The signals of electromagnetic waves emitted by human bodies represent the specific condition of the human body and therefore, different signals of electromagnetic waves will be emitted by the conditions of good health, sub-health, diseases, etc. The conditions of life can be analyzed if such specific electromagnetic wave signals can be analyzed.

The **Quantum Bio-Electric Whole Health Analyzer** is a new instrument created to analyze such phenomenon. The weak magnetic frequency and energy of the human body are collected by holding the sensor, and after amplification by the instrument in the built-in microprocessor, the data is compared with the standard quantum resonant spectrum of diseases, nutrition and other indicators incorporated in the instrument to judge whether the sample waveforms are irregular using the **Fourier approach**. Analysis and judgment can thus be made on health conditions and main problems of the tested person based on the result of waveform analysis, as well as standard protective and curative proposals.

The method of this form of analysis is an emerging rapid, accurate and non-invasive spectral testing method and particularly suitable for comparison of curative effects medicine and health products, and check of sub-health conditions. There are more than 30 main analysis items, including cardiovascular and cerebrovascular conditions, bone mineral density, trace elements, blood lead, rheumatism, lung and respiratory tract, nephropathy, blood sugar, stomach and intestines, liver and gall, cranial nerves, gynecology, prostate, bone disease, the trace elements of selenium, iron, zinc and calcium, etc.

With only 10 or so cells of pathological change, the analyzer can capture the changes of cells and predict the precursor of disease. By taking health-care actions quickly, you will be enabled to effectively prevent many of the various chronic diseases.

Multiple indicators of your health can be obtained within minutes. This analysis method is designed to save your time and energy. The database of the analysis system has been established with scientific methods, strict health statistic treatment and demonstration of a large number of clinical cases, thus leading to high analysis accuracy.

Why It Won't Cost You An Arm Or A Leg For This Service ...but Just Might Save A Liver or A Kidney

If you have ever had a blood test, CT scan or MRI, you would expect to pay hundreds or even thousands of rands for the information compiled in your health reports. In addition, many of the findings produced by the analyzer methods cannot be detected by conventional testing.

Since we established Celebration Health, in 1997, we have seen health care costs skyrocket and the tremendous financial burden those costs have placed on both the insured and the uninsured that have to pay out-of-pocket. The major factor in driving these healthcare costs has been the multi-million dollar equipment used in conventional testing and the costs of processing and analyzing the test results. We do not intend to be part of the problem by charging you an inflated fee for this service.

We are also pleased to serve as a distributor of the device to other health-oriented companies throughout South Africa and many countries throughout Africa.

Using the analysis as a guide, now everyone can put their health on the right track.

Complete 20 Health Report Analysis...

For A Limited Time Only R350.00

Substantially Less Than The Cost Of Even one Blood Test

Testing is scheduled by appointment Monday-Friday 8.30 a.m. - 6 p.m. and Saturday 9 a.m. - 1 p.m.
For Questions Or To Schedule An Appointment Stop In or Contact: Celebration Health.

How Do I Use My Health Reports?

- **You can accept the results and do nothing.**
- **You can address any health issues with appropriate dietary and lifestyle changes.**
- **You can have your health care practitioner review the reports with you and make recommendations**
- **Whatever option you choose, your health is now in your control.**

How Long Should I Wait To Be Re-Tested?

Depending on the specific health issue, changes may take from days to months. In most cases, the problem took a period of time to develop and it may take time to get your health back on track.

Generally, if you get re-tested after 30-90 days of your initial testing, you will see improvements in your test results. Of course, if you didn't make any positive health adjustments, you may see more negative results from your tests.

Information Regarding the Testing

The health check is made in a non-invasive way, without blood being drawn and without any radiation being emitted. The testing device doesn't harm the body. The analyzer measures the magnetic fields in your body

to obtain the results, therefore people with **pacemakers or those with metal surgical replacements** would not be suitable for testing. The test is also not effective for **pregnant or nursing women**.

To Achieve The Most Accurate Results - At Least 2 Hours Before Your Test:

- Do not consume food, alcohol or caffeinated beverages
- Limit exercise
- Postpone taking medications, if possible
- Refrain from wearing perfume or cologne for testing

During The Testing:

- Wear loose, comfortable clothing
- Remove metal articles and disable cell phones
- Relax, do not speak and keep steady breathing

Arrive at least 10 minutes before your scheduled appointment. We reserve the option to charge for missed appointments. (Call at least one hour before your appointment in the event you have to cancel or will be late for your appointment otherwise you will be held liable for the cost of your test.)
